

LOCAL BACKFLOW ASSEMBLY TESTERS- 2025

The following Washington State Certified Backflow Assembly Testers have supplied Irvin Water District with copies of their credentials and have requested that we inform you of their certification and availability. Only testers who have given Irvin their information and use our forms will be accepted. This is just a partial list of testers in the area who are qualified to test backflow preventers.

We suggest that you secure several estimates of cost for testing your backflow assembly, and that you ask if they can repair assemblies that fail the test
